Re: KUBA (AM), Yuba City, California  
Facility Identification Number: 56365  
Results Radio of Chico Licensee, LLC ("RRC")  
Special Temporary Authority

Dear Counsel:

This is in reference to the request filed November 24, 2010, on behalf of former licensee Nevada County Broadcasters, Inc. ("NCB").<sup>1</sup> NCB requests further extension of the special temporary authority ("STA") granted on February 16, 2007, to operate Station KUBA with parameters at variance from licensed values and/or reduced power while maintaining monitor points within licensed limits.<sup>2</sup>

In support of the request, NCB states that Station KUBA has been restored to operation with licensed power but that, inexplicably, an application for direct measurement of operating power has not yet been filed with the Commission. NCB states that the application will be filed shortly.

We note that the previous STA expired on July 30, 2008. Our review indicates that the circumstances presented warrant grant of STA in order to provide for service to the public, and that the requested STA facilities are the same as were previously authorized. However, in light of the lapse of time between the expiration of the prior STA and the filing of the instant request, it will be considered as a request for a new STA; the authority granted will not cover the period between the expiration of the prior STA and the filing of the instant request.

Accordingly, the request for STA IS HEREBY GRANTED. Station KUBA may operate with parameters at variance from licensed values and/or reduced power while maintaining monitor points within licensed limits. It will be necessary to further reduce power or cease operation if complaints of interference are received. KUBA must notify the Commission when licensed

---

<sup>1</sup> Application BAL-20100902AEE, for consent to assignment of the KUBA license from NCB to RRC, was granted on October 21, 2010, and consummated on December 13, 2010.

<sup>2</sup> KUBA is licensed for operation on 1600 kHz with 5 kilowatts daytime and 2.5 kilowatts nighttime, employing a directional antenna during nighttime hours only (DA-N-U).

operation is restored.<sup>3</sup> KUBA must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. *See* 47 CFR § 1.1310. The authority granted herein does not cover the period between July 30, 2008, and November 24, 2010, and is without prejudice as to whatever action the Commission may take with respect to operation of Station KUBA during the foregoing period.

This authority expires on **July 6, 2011**.

Sincerely,

A handwritten signature in blue ink, appearing to read "Charles N. Miller", with a long horizontal flourish extending to the right.

Charles N. Miller, Engineer
